

CBS Portal Discussion CAMS Managers Meeting

October 14, 2004

CBS Portal - Overview

- **Single, centrally maintained, Web-based application to access NIST business systems and related content**
- **Originally deployed in FY03 as part of NIST Phase III implementation to access CAMS-related analytical and reporting tools**
- **Expanded functionality in FY04 to access all NIST business systems**
- **Proposed name and URL: Commerce Business Systems (CBS) Portal - cbs.nist.gov**

CBS Portal- Users

- **Deployed to all nine bureaus that NIST services**
- **Approximately 1000 internal and external users currently supported**
- **Access rights vary depending on user group (e.g., internal versus external users)**

CBS Portal - Technology

- **Oracle 9iAS platform**
- **Synchronized passwords for CAMS-related applications**
- **Integrated Single Sign On functionality using Oracle OID for limited Web modules (Reports, Downloads, My Tools)**
- **Integrated with Mercury Quick Test automated testing tool for limited Web modules (Reports, Downloads, My Tools)**

Frequently Asked Questions

Next Steps

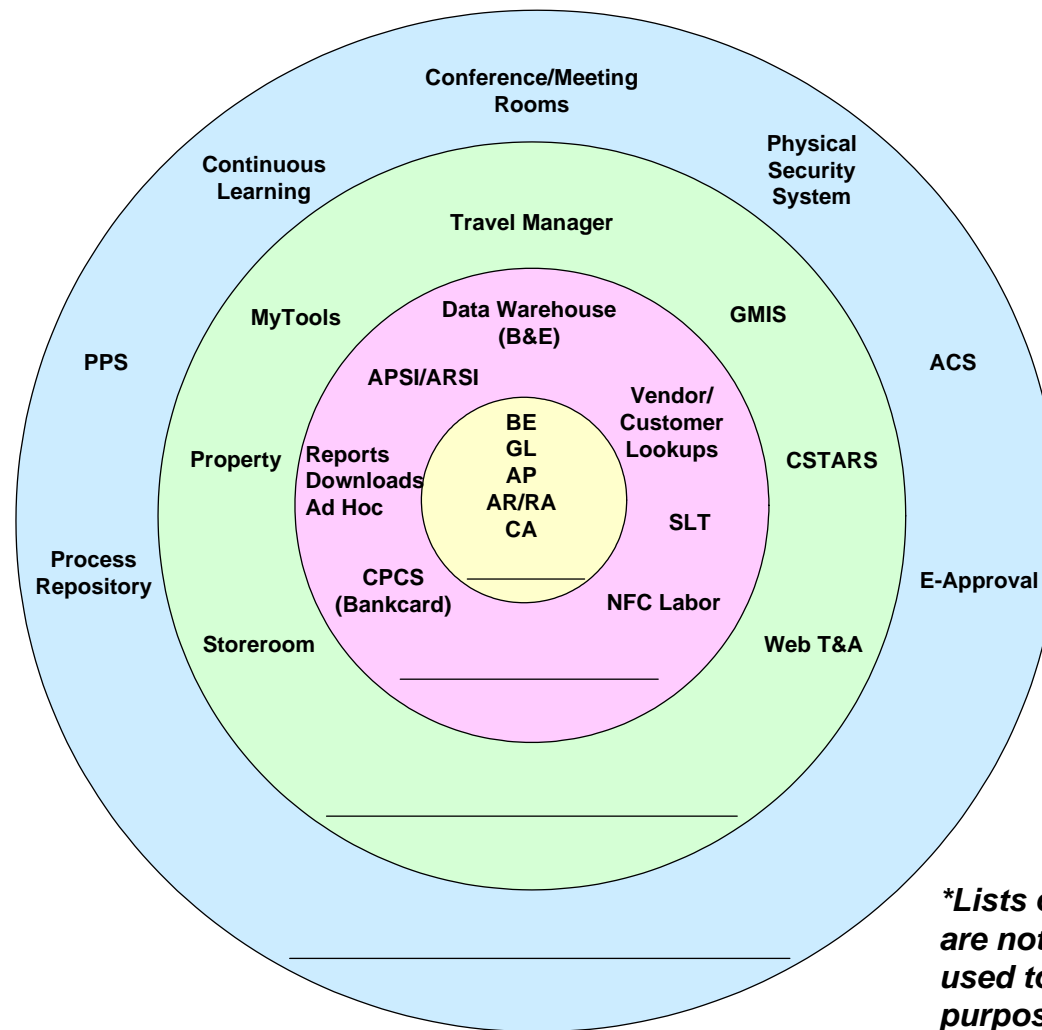

Short Term

- Roll out of new look and upgrade to 10g AS in first quarter FY05
- Expanded password synchronization

Long Term

- Expanded Single Sign On
- Additional customization by user group
- Content management centralization
- Deployment to additional Commerce bureaus (requires significant content management effort)

CBS Name

**Lists of system components are not comprehensive, but used to illustrate for naming purposes.*
